Heater Core Flushing Tool

Quick..... Easy..... Save \$400.00..... Simple to use

A Quick and Easy way to flush your Mustang or other vehicle's heater core of rust and buildup.

20 minutes to have a warm interior.

Simple maintenance keeps your heater working for many years.

Heater Core Flushing Tool

Simple
and
Effective

The problem with most heaters today is they are buried in the dash, and it is an expensive and time consuming task to get to remove them for replacement or to flush them out.

And some vehicles have the heater hose clamps behind the firewall. What a pain !.....

With our tool you can fix a clogged core, or maintain one with little cost and effort.

Why pay the dealer **\$400.00** to do what you can do yourself for **\$9.99**.

All it takes is a few small tools and 20 minutes of your time.

Do this every time you change your antifreeze and you'll have years and years of trouble free heat from your car's heater core.

Heater cores trap rust and

20 minutes and you are warm again.

dirt from the coolant, and over time lose efficiency or stop working altogether.

Our simple tool and a few minutes of time will correct or prevent costly repairs and poor heating problems.

Don't put off getting one, you may need it tomorrow!
